Short Description

This non-electrical water driven proportional injection system enables the injection and/or dosage of detergents or decontamination solutions into the water flow.

Description

This non-electrical water driven proportional injection system enables the injection and/or dosage of detergents or decontamination solutions into the water flow (with On/Off function during operation). It is an ideal component for use in conjunction with the Water Flow Heaters, or even as an individual system. Constructed using a steel framework, its features include standard Storz-D Connectors, inlet filter, check valve and pressure gauge.

Additional Information

Application area	Civil Defence, Field Hospitals, Military, Decontamination and Hazardous Goods Operations, Weatherproof Shelter for Sensitive Equipment and Workshops, United Nations, NGOs/Humanitarian organizations, Associations & Youth groups – tent camps
Width	0.94 ft
Length	1.89 ft
Height	2.21 ft
Flow rate	0.25 - 45 l/min.
Operating pressure	0.5 - 9.7 bar
Max temperature	104°F
Water temperature	max. 104°F
